

Solution Requirements

PocketSmart AI | Team ID: 6ab222a5e880316a482c6374 | Date: 30 September 2026

Maximum Marks: 4

Date	30 September 2026
Team ID	6ab222a5e880316a482c6374
Project Name	PocketSmart AI
Team Members	Joison V, Gurun J, Sanjai Y, Aswarth U, Yaswanth N
Maximum Marks	4 Marks

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority
1	Authentication	Users can register, log in and log out.	High
2	Home Planner	Collect room details, quantities and budget and generate home recommendations.	High
3	Party Planner	Collect budget, guest count and event details and generate party suggestions.	High
4	Jewelry Planner	Use budget, occasion, style and optional outfit image to generate jewelry suggestions.	High
5	Recommendation Engine	Send relevant user context to Gemini AI and return structured recommendations.	High
6	History	Allow users to review previous recommendation activity.	Medium
7	Session Data	Maintain personalized session information for the user experience.	Medium

Step 2: Non-Functional Requirements (NFR)

Category	Requirement	Target / Description
Usability	Simple interface	Users should understand planner inputs and results easily.
Performance	Responsive interaction	Backend should process requests without unnecessary steps; no measured SLA is claimed.
Security	Credential/API protection	Keep authentication data and AI credentials protected; do not expose secrets in source control.
Maintainability	Modular backend	Separate planner routes and recommendation logic for easier updates.
Reliability	Graceful handling	Handle invalid input and AI response variations without breaking the interface.
