Problem-Solution Fit for PocketSmart AI

User Problem	PocketSmart AI Response	Expected Value
Budget uncertainty	Budget is a core input to each planner.	Recommendations are aligned to the selected spending limit.
Too many choices	AI creates a focused recommendation list.	Less manual comparison.
Different planning contexts	Separate Home, Party and Jewelry planners.	One application supports multiple everyday needs.
Need for personalization	Uses preferences, occasion and optional outfit image.	Recommendations can reflect individual context.
Need to revisit results	History module stores previous recommendation activity.	Users can review earlier planning activity.
