Current System Limitations

S.No	Limitation	Impact	Priority to Address
1	Recommendation quality depends on AI output and available product information.	Some suggestions may require user verification.	High
2	External platform information can change over time.	Product/service details may become outdated.	Medium
3	Internet and valid AI/API configuration are required.	Offline use is limited.	Medium
4	No documented real-time price tracking layer.	Users may still need current price verification.	High

Future Roadmap

- Add more shopping and service platforms.
- Add advanced price comparison and filtering.
- Improve recommendation history and analytics.
- Add more languages and voice interaction.
- Add stronger real-time product availability and price tracking.
- Extend planner categories while keeping the same recommendation architecture.
