Final alignment with the example template

1. Team ID and all five team members are included.
2. Project name is consistently PocketSmart AI.
3. Ideation, problem statement and empathy documents relate to budget planning and recommendations.
4. Requirement and technology documents use the documented FastAPI + Gemini AI architecture.
5. Design documents include a project-specific architecture and DFD.
6. Planning, development and testing sections reflect the three planners, authentication and history.
7. Documentation includes project scenarios, workflow, routes, screenshots, advantages, limitations and future enhancements.
8. Demonstration documents assign all five members and cover the implemented features.

Note

Where the supplied PocketSmart AI documentation did not provide an exact value (for example, measured load-test numbers, a deployed URL, or exact source filenames), this package avoids inventing that value and marks it for final repository verification.
